

## **Health and Wellbeing Policy East West University**

### **Access to sexual and reproductive health-care services including information and education services.**

In the Medical Center, the doctors and the nurse provide services and counseling to the students and academic and non-academic staff if they get sick. They also guide students about healthy lifestyles, food habits, and behaviors. The medical center provides health education including gender issues, and sexual issues, and reproductive health issues in a comfortable environment. If needed, with a positive psychological approach and clinical support.

University campus is enriched with a daycare center and a female zone for their privacy and personal hygiene as well.
